The Eco-Conscious Warrior King
Chhatrapati Shivaji Maharaj

KEY CONTRIBUTION:

- Preserved dense forests around forts as natural defense and biodiversity zones.
- Encouraged plantation of fruit-bearing and medicinal trees near forts and villages.
- Implemented water conservation through tanks, stepwells, and rainwater harvesting in forts like Rajgad and Raigad.

WHY IT MATTERS:

- Showcased how environment and strategy can go hand in hand.
- Promoted self-sustaining ecosystems in fort regions to support soldiers and locals.
- Inspired local governance (Swarajya) with deep respect for natural resources.

LEGACY FOR TODAY

- **Model fort development as eco-tourism and heritage education zones.**
- **Encourage youth to learn from his eco-strategic vision and water wisdom.**
- **Plant native trees in his memory – "Har Killa, Ek Vriksha" initiative.**

Spiritual Inspiration Sri Guru Nanak Dev Ji

श्लोक 1:

नाम जपो, किरत करो, वंड छको
Naam Japo, Kirat Karo, Vand Chhako

- मराठी: ईश्वराचे नामस्मरण करा, प्रामाणिक श्रम करा आणि जे मिळाले ते इतरांशी वाटून घ्या।
- हिंदी: ईश्वर का नाम जपो, ईमानदारी से मेहनत करो और जो पाया है, उसे दूसरों में बांटो।
- English: Chant the Name of God, work honestly, and share what you earn with others.

श्लोक 2:

बलिहारी कुदरत वसिया
Balihari Kudrat Vasiya

- मराठी: मी त्या निसर्गावर बलिहार जातो, कारण त्यातच परमात्मा वास करतो.
- हिंदी: मैं उस प्रकृति पर बलिहार जाता हूँ जिसमें ईश्वर वास करता है।
- English: I bow to nature, for within it resides the Divine.

श्लोक 3:

पवन गुरु, पाणी पिता, माता धरत महत
Pavan Guru, Pani Pita, Mata Dharati Mahat

- मराठी: वारा गुरु आहे, पाणी वडील आहे आणि धरती ही महान आई आहे.
- हिंदी: वायु गुरु है, जल पिता है और धरती hamari महान माता है।
- English: The wind is our teacher, water our father, and the earth our great mother.

In Collaborations

Skilled India, Self-reliant Citizens

MERA KAAM MERI PEHCHAAN

A MISSION TO MOTIVATE AND EDUCATE

A group of like minded nature loving individuals focusing on Nature.

www.merakaammeripehchaan.org

MERA KAAM MERI PEHCHAAN

MISSION 1 MERA PED MERI PEHCHAAN

- STAGE 1 SEED COLLECTION (BEEJ SANGRAH ABHIYAN)
- STAGE 2 GROWING PLANT (BEEJ SE PODHE TAK)
- STAGE 3 TREE ADOPTION (MERA PED, MERI JIMMEDARI)
- STAGE 4 ORGANIC FARMING (JAIVIK KHETI KA SAMARTHAN)

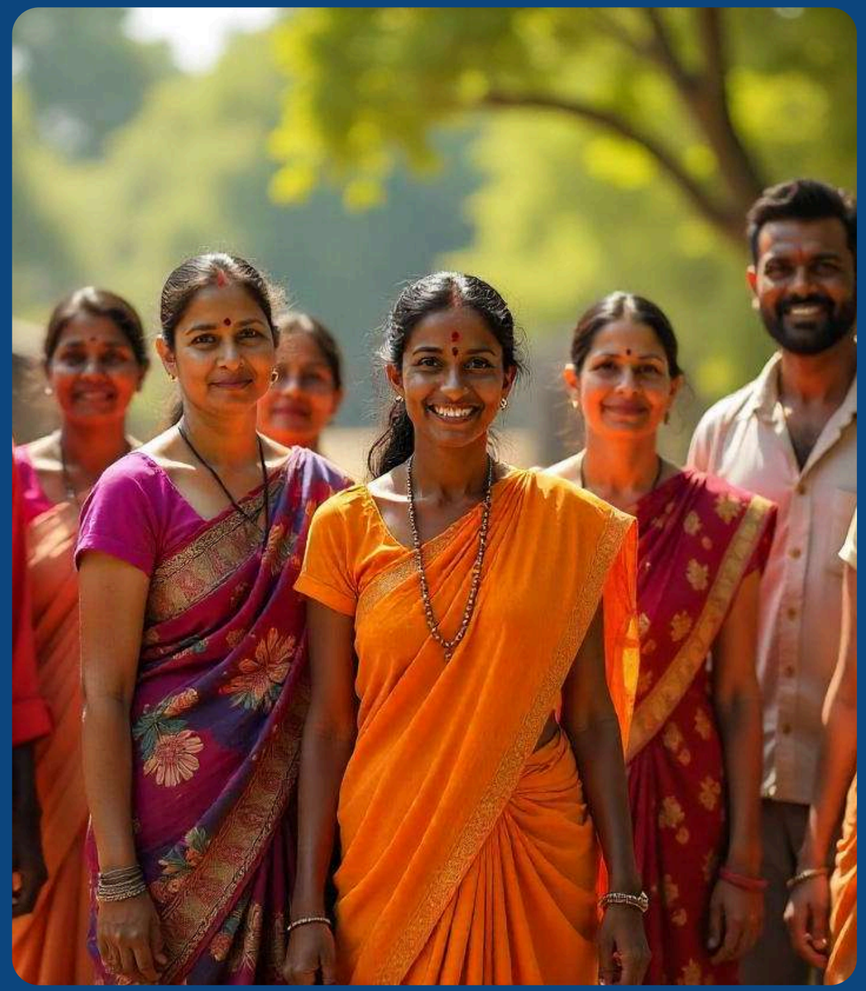

MISSION 2JAL HI JEEVAN HAI

- STAGE 1 RAIN WATER HARVESTING (VARSHA JAL SANRAKSHAN)
- STAGE 2 HOW TO SAVE WATER (JAL HI JEEVAN HAI ISE BAHCHAANA HAMARI ZIMMEDARI)

MISSION 3 SAY NO TO PLASTIC

MISSION 4 ECO BRAND SALE & PROMOTIONS

MISSION 5 HACKATHON

Spiritual Inspiration
Sri Guru Har Rai Sahib

KEY CONTRIBUTION:

- Guru Har Rai Sahib Ji maintained a vast herbal garden with over 500+ medicinal plants in year 1650.
- Guru Sahib promoted Ayurvedic healing, treating common people.
- Guru Sahib's herbs saved the life of Mughal Prince Dara Shikoh son of Shah Jahan 5th Emperor of Hindustan who made Tajmahal, showcasing compassion beyond boundaries.

WHY IT MATTERS:

- Preserved indigenous knowledge of medicinal herbs and healing practices.
- Advocated for a balanced coexistence with nature.

LEGACY FOR TODAY

- **Inspire youth to explore traditional Indian plant medicine.**
- **Create herbal gardens in schools and Gurudwaras in his memory.**
- **Encourage preservation of native herbs and eco-conscious living.**

A Historic Initiative
Starting from Maharashtra!

FOR THE FIRST TIME IN HISTORY, WE ARE LAUNCHING A REVOLUTIONARY PLANT ADOPTION MISSION FROM MAHARASHTRA, SETTING AN EXAMPLE FOR THE WORLD.

Inspired by

HON'BLE PRIME MINISTER SHRI NARENDRA MODI JI

Scheme – "Ek Ped Maa Ke Naam 2.0", promoting large-scale community-driven afforestation.

AND

HON'BLE CHIEF MINISTER SHRI DEVENDRA FADNAVIS JI

Scheme – Mission Plantation a bold plan to plant 100 million trees in 2025 under the 'Green Maharashtra, Prosperous Maharashtra' campaign. fostering green spaces across the state.

MAHARASHTRA TAKES THE LEAD IN BUILDING A GREENER, HEALTHIER FUTURE! LET'S SET AN EXAMPLE FOR THE WORLD.

Next ⟶

India’s Green Awakening Begin from Maharashtra!

HON’BLE UNION MINISTER FOR ENVIRONMENT, FOREST AND CLIMATE CHANGE

Shri Bhupender Yadav Ji

National Vision – “Green India Mission”

A BOLD NATIONAL INITIATIVE TO:

- Enhance forest/tree cover across 10 million hectares.
- Involve local communities, tribal groups, and youth in sustainable forest management.
- Strengthen eco-restoration in degraded forest areas.

HON’BLE FOREST MINISTER OF MAHARASHTRA

Shri Ganesh Ramachandra Naik .

Scheme – “Har Din Ek Vruksh”

PIONEERING DAILY PLANTATION MOVEMENT ACROSS MAHARASHTRA –

- Empowering citizens to plant one tree every day.
- Mobilizing youth, schools, and institutions toward daily green action.
- Linking ecology with culture by connecting plantations with festivals and rituals.

Next ⟶

India’s Green Awakening Begin from Maharashtra!

HON’BLE HIGHER AND TECHNICAL EDUCATION MINISTER OF MAHARASHTRA

Shri Chandrakant Patil Ji

Initiative – “Green Campus Mission”

TRANSFORMING EDUCATIONAL INSTITUTIONS INTO ECO-CHAMPIONS :

- Promoting plantation drives in colleges and technical universities.
- Integrating environmental education and awareness into academic culture.
- Partnering with student councils for sustainable campus initiatives.
- Building a generation that learns, leads, and lives green.

MAHARASHTRA’S STUDENTS BECOME THE GUARDIANS OF TOMORROW’S ENVIRONMENT!

NATIONAL SERVICE SCHEME (NSS) SUPPORT

5 Lakh Volunteers Strong – Joining the Green Mission

Planting vs. Adopting

A World of Difference!

PLANTATION: THE FIRST STEP BUT NOT ENOUGH

- Large-scale tree planting is crucial for reforestation and restoring green cover.
- Typically managed by governments, NGOs, or corporations as part of environmental projects.
- The challenge? Many trees don't survive due to lack of care, water, or unfavorable conditions.

ADOPTION: A COMMITMENT, NOT JUST AN ACT

- Planting a tree is just the beginning—adoption ensures its survival.
- It's a personal responsibility to grow, nurture and protect.
- A single adopted tree purifies the air, shelters birds, & cools its surroundings over time.
- It also nourishes through food, has medicinal and health benifits and impacts the carbon footprint.

When you adopt a plant, you don't just plant it—you raise it.

Next ⟶

Seed Collection & Preservation (Beej Sangrah Abhiyan)

COLLECT AND PRESERVE SEEDS OF NATIVE PLANTS, FRUITS, AND TREES FOR FUTURE PLANTATIONS.

SCIENTIFIC INSIGHT: COMMUNITY SEED BANKS PROMOTE BIODIVERSITY, CLIMATE RESILIENCE, AND SAFEGUARD INDIGENOUS VARIETIES.

KEY ACTIVITIES:

- Organize seed collection drives.
- Store seeds in cool, dry containers with labels.
- Involve schools and local farmers in the process.

WHY IT MATTERS:

- Conserves heirloom species and local ecosystems.
- Reduces dependency on commercial seed suppliers.

ALARMING CAUSE:

Over 75% of traditional crop varieties lost in the last 100 years (FAO).

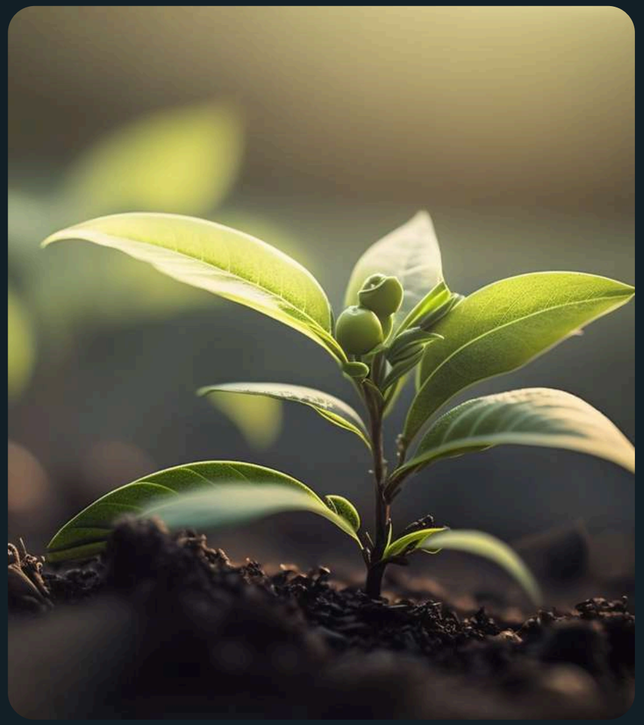

STATE>DIVISION>DISTRICT>TALUKA WISE SEED BANKS

Next ⟶

Growing Plants (Beej Se Podhe Tak)

CULTIVATE 10 YOUNG SAPLINGS – NURTURE THEM WITH CARE, SUNLIGHT, AND LOVE FOR A FEW MONTHS.

SCIENTIFIC INSIGHT: TREES CONTRIBUTE TO AROUND 28% OF EARTH'S OXYGEN. WHILE ESSENTIAL, THEY ARE PART OF A LARGER BIOSPHERE.

KEY ACTIVITIES:

- Choose native or climate-resilient species.
- Use compost or organic manure.
- Record growth with photos or journals.
- Encourage children to name and bond with their trees.

WHY IT MATTERS:

- Trees absorb carbon dioxide, improve air quality, and provide habitat for wildlife.
- Urban greenery also helps reduce the heat island effect.

ALARMING CAUSE:

India lost over 14% of its tree cover between 2001–2020 (Global Forest Watch, 2021).

Next ⟶

Nurturing Plants For 3 Years

(Mera Ped, Meri Jimmedari)

ADOPT AT LEAST 2 PLANTS NEAR YOUR HOME AND WATER THEM REGULARLY FOR ATLEAST 3 YEARS.

SCIENTIFIC INSIGHT: PROPER PLANT CARE ENSURES HIGHER SURVIVAL RATES AND ENHANCES LOCAL BIODIVERSITY.

KEY ACTIVITIES:

- Adopt roadside or park plants.
- Involve families, schoolchildren, RWAs.
- Use recycled kitchen water (greywater reuse).
- Share progress through community groups or social media.

WHY IT MATTERS:

- Encourages responsibility and emotional connection.
- Builds green corridors in urban neighborhoods.

ALARMING CAUSE:

Over 75% of traditional crop varieties lost in the last 100 years (FAO).

Next ⟶

Guru Nanak Sacred Forest

A GREEN TRIBUTE TO GURU NANAK DEV JI'S 550TH BIRTH ANNIVERSARY

MISSION: PLANTING MICRO-FORESTS USING THE MIYAWAKI METHOD TO REVIVE NATIVE BIODIVERSITY AND COMBAT CLIMATE CHANGE.

KEY HIGHLIGHTS:

- 303+ forests across India & Pakistan
- 1,67,000+ native trees planted
- 100% organic, 95% survival rate
- Forests mature in just 2–3 years
- Supports endangered and rare species
- Revives birds, bees, & butterflies

WHY MIYAWAKI METHOD?

- 10x faster growth
- 30x denser forests
- 100x more biodiversity
- Self-sustaining in 3 years

GLOBAL PLEDGE:

- 1 MILLION TREES GLOBALLY (PART OF GURU NANAK 550 CAMPAIGN)
- SCHOOLS, CORPORATES, AND CITIZENS ACTIVELY INVOLVED

A living forest is the best legacy. Join the green revolution. Visit: ecosikh.org/guru-nanak-sacred-forest

Next ⟶

Motivating for Organic Farming

(Jaivik Kheti ka Samarthan)

ORGANIC FARMING IS FREE FROM HARMFUL CHEMICALS AND RICH IN NUTRIENTS.

SCIENTIFIC INSIGHT: ORGANIC METHODS ENHANCE SOIL BIODIVERSITY AND WATER RETENTION CAPACITY (FAO, IFOAM).

KEY ACTIVITIES:

- Promote composting of kitchen waste.
- Organize local organic food bazaars.
- Support community gardens.

WHY IT MATTERS:

- Protects soil health and pollinators.
- Safer food for families and less pesticide runoff.

ALARMING CAUSE:

More than 30% of India's soil is degraded due to chemical overuse (ICAR).

Next ⟶

Soil-less Farming: Hydroponics & Aeroponics

HIMEDIA

WHAT IS SOIL-LESS FARMING?

SOIL-LESS FARMING REFERS TO THE METHOD OF GROWING PLANTS WITHOUT THE USE OF TRADITIONAL SOIL. INSTEAD, PLANTS RECEIVE NUTRIENTS THROUGH WATER-BASED OR AIR-BASED MEDIUMS.

HYDROPONICS: A METHOD OF GROWING PLANTS USING MINERAL-RICH WATER SOLUTIONS INSTEAD OF SOIL.

- Plants grow in inert mediums like cocopeat, perlite, or gravel.
- Nutrients are directly absorbed from water.
- Water-efficient: Uses up to 90% less water than traditional farming.
- Controlled environment reduces need for pesticides.
- Ideal for urban and vertical farming.

AEROPONICS: PLANTS ARE GROWN IN AIR OR MIST ENVIRONMENTS WITHOUT USING SOIL OR AGGREGATE MEDIUM.

- Roots are suspended in air and misted with nutrient-rich solutions.
- Highly oxygenated system for faster root development.
- Disease control is easier due to sterile setup.
- Suitable for space-constrained areas and futuristic farming solutions.

www.himediastore.com

Next ⟶

Motivating for Rainwater Harvesting (Varsha Jal Sanrakshan)

DID YOU KNOW? RAINWATER HARVESTING CAN FULFILL UP TO 70% OF HOUSEHOLD NEEDS (AS PER CGWB).

SCIENTIFIC INSIGHT: INDIA FACES SEVERE WATER STRESS; HARVESTING RAIN IS KEY FOR SUSTAINABLE WATER MANAGEMENT.

KEY ACTIVITIES:

- Promote rooftop harvesting systems.
- Create awareness via door-to-door campaigns.
- Encourage construction of recharge pits in societies.

WHY IT MATTERS:

- Replenishes groundwater tables.
- Reduces dependence on municipal supply.

ALARMING CAUSE:

21 Indian cities may run out of groundwater by 2030 (NITI Aayog, 2019).

Next ⟶

How to Save Water

(जल ही जीवन है | इसे बचाना हमारी ज़िम्मेदारी है)

SCIENTIFIC INSIGHT: DRIP IRRIGATION SYSTEMS SAVE UP TO 70% MORE WATER COMPARED TO TRADITIONAL METHODS.

KEY ACTIVITIES:

- Fix leaking taps and install low-flow fixtures at home and institutions.
- Use buckets instead of hoses for cleaning and washing.
- Promote rainwater harvesting in schools and buildings.
- Reuse greywater from kitchen or bathroom for gardening.
- Educate communities through posters, workshops, and street plays.

WHY IT MATTERS:

- Only 1% of Earth's water is usable freshwater.
- Conserving water reduces strain on rivers, lakes, and underground aquifers.
- It ensures availability for future generations and supports agriculture and biodiversity.

ALARMING CAUSE:

India faces water stress in over 54% of its districts (NITI Aayog, 2020).

Saying No to Plastic (Plastic Mukt Jeevan)

PLASTIC TAKES CENTURIES TO DEGRADE AND HARMS BOTH LAND AND AQUATIC LIFE

SCIENTIFIC INSIGHT: AROUND 11 MILLION METRIC TONS OF PLASTIC WASTE ENTER OCEANS ANNUALLY (UNEP).

KEY ACTIVITIES:

- Promote alternatives like cloth/jute bags, bamboo brushes.
- Install collection bins for segregated plastic waste.
- Educate shopkeepers and schools.

WHY IT MATTERS:

- Reduces toxic pollution.
- Protects marine life and soil quality.

ALARMING CAUSE:

UNEP, CPCB, WWF India, India Plastics Pact

Next ⟶

Promoting Eco-Friendly Brands & Products (Harit Jeevan ke Saathi)

PROMOTE BRANDS THAT OFFER BIODEGRADABLE, REUSABLE, AND SUSTAINABLE PRODUCTS.

SWITCHING TO ECO-FRIENDLY ALTERNATIVES CAN REDUCE AN INDIVIDUAL'S ENVIRONMENTAL FOOTPRINT BY 30–60% (WRI).

KEY ACTIVITIES:

- Highlight verified eco-labels (e.g., EcoMark, GreenPro).
- Collaborate with local eco-startups.
- Organize sustainable product fairs.

WHY IT MATTERS:

- Encourages responsible consumerism.
- Builds a circular economy.

ALARMING CAUSE:

Bureau of Indian Standards (BIS – Eco Mark), WRI, UNEP, CII Green Products Council

Thanks for the support

Special Thanks to NextPlatforms!

EMPOWERING MISSION DIGITALLY

NextPlatforms, a leading digital solutions company, has played a crucial role in amplifying our movement by providing:

- Website Development – Built a user-friendly platform for plant adoption.
- Social Media Support – Designed impactful campaigns, posts, and videos.
- Community Engagement – Helped reach thousands through online promotions.

Thank you, NextPlatforms, for making our green dreams a digital reality!

Next Platforms

Website: https://www.nextplatforms.in/

Social Media & Awareness Team

Ms. Ishgun Kaur
17 Years

Sdr. Ekamjot Singh
13 Years

KEY CONTRIBUTIONS:

DAILY DIGITAL AWARENESS

Each member posts eco-themed content daily – covering trees, plastic reduction, organic farming & more.

CREATIVE CAMPAIGNS

Designed impactful reels, posters & carousels shared across Instagram, Facebook & WhatsApp.

TOPIC-WISE PRESENTATIONS

Conducted individual presentations on green topics to educate and inspire online communities.

COMMUNITY ENGAGEMENT & FEEDBACK

Managed WhatsApp groups, ran polls, and interacted with the public to expand reach & gather insights.

THANK YOU FOR SUPPORTING OUR GREEN MISSION!

Together, we're not just planting trees — we're planting hope for future generations.
